Q: Como desabilitar o hover do input calc? Tenho uma função de especificação de elementos, porém o hover do input calc ainda permanece, eu preciso apagar esta função de acordo com o value do input calc que escolher. Esta é minha página:

```
.calc { height: 30px; width: 30px; float: right; margin: 4px 15px 0 15px; background-color: rgb(150, 136, 165); cursor: pointer; } input:hover +.calc { background: rgb(50, 50, 110); }
```

A: Para isso pode colocar a classe calc em li e depois limitar a transition deslizando de li em li com:

```
input:not(:hover).calc { transition: none; } li:hover.calc { transition: 10px; background: rgb(50, 50, 110); } f678ea9f9e
```
